Following screen will appear.

Click on the **Create Account** button. (As shown in the yellow circle)

Type a **Subdomain** name of your choice (As shown in the yellow circle 1)

Select **Domain Extension**. (As shown in the yellow circle 2)

Click on **Check Availability** button. (As shown in the yellow circle 3)

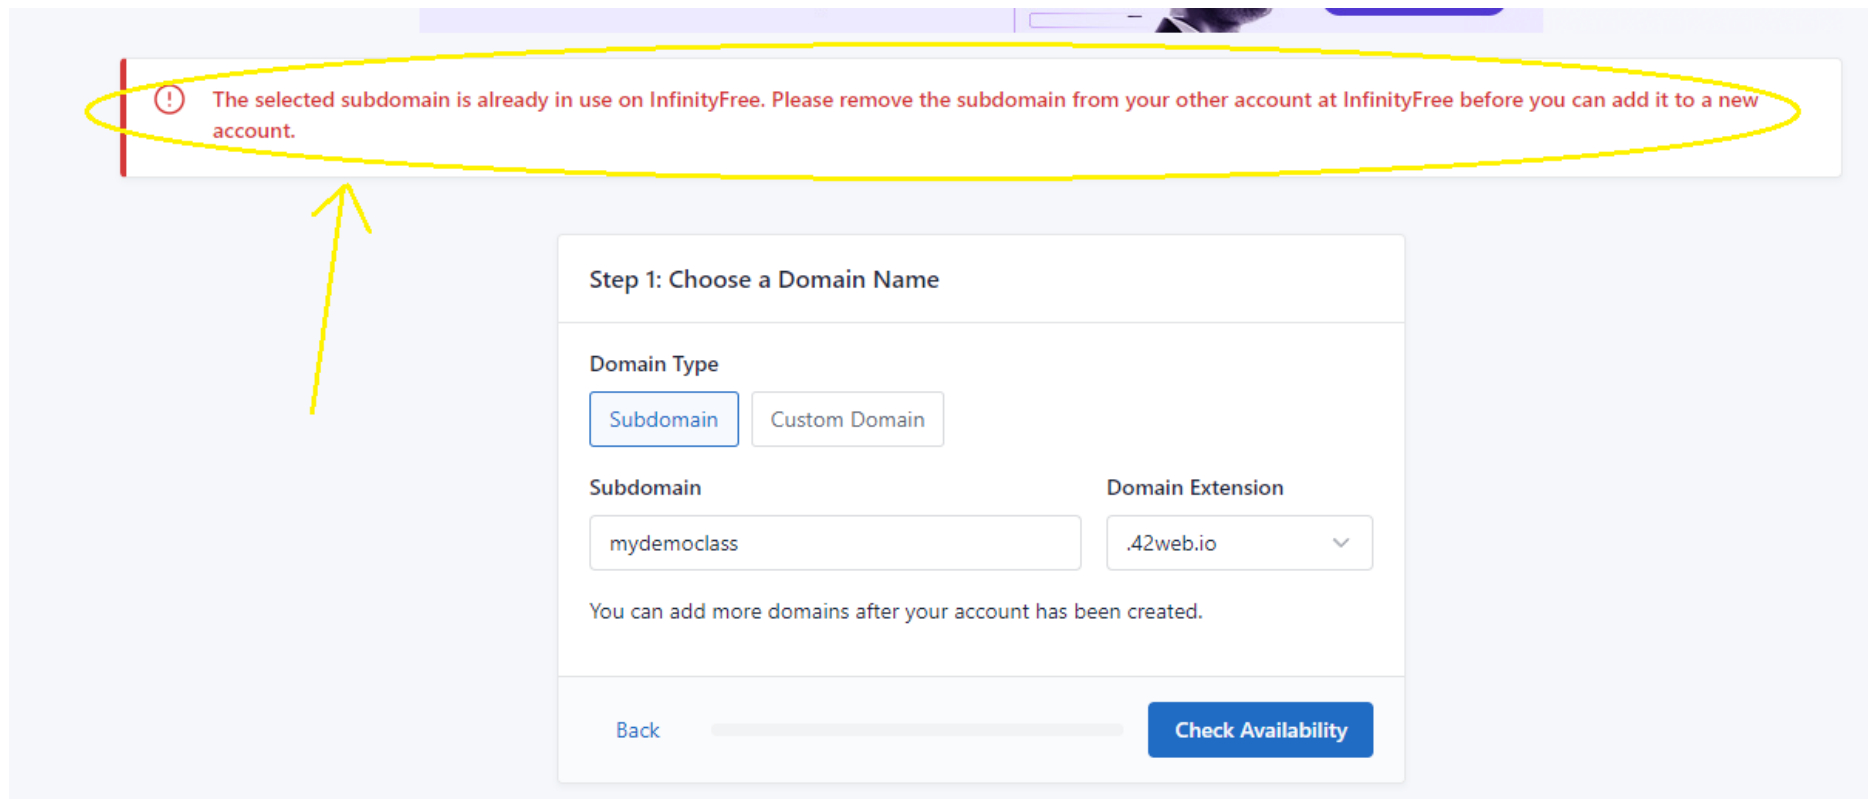

The image shows a web form titled "Step 1: Choose a Domain Name". It contains the following elements:

- Domain Type:** Two buttons, "Subdomain" (highlighted with a yellow circle) and "Custom Domain".
- Subdomain:** A text input field containing "your-name" (highlighted with a yellow circle and labeled with a yellow arrow and the number "1").
- Domain Extension:** A dropdown menu showing ".lovestoblog.com" (highlighted with a yellow circle and labeled with a yellow arrow and the number "2").
- Check Availability:** A blue button at the bottom right (highlighted with a yellow circle and labeled with a yellow arrow and the number "3").
- Back:** A link at the bottom left.
- Text:** "You can add more domains after your account has been created."

Yellow circles and arrows are used to highlight and point to the "Subdomain" input field (1), the "Domain Extension" dropdown (2), and the "Check Availability" button (3).

“The selected subdomain is already in use on InfinityFree. Please remove the subdomain from your other account at InfinityFree before you can add it to a new account.”

If above message appears on your screen (As shown in the yellow circle), this means you cannot take your desired subdomain. You need to try something else subdomain.

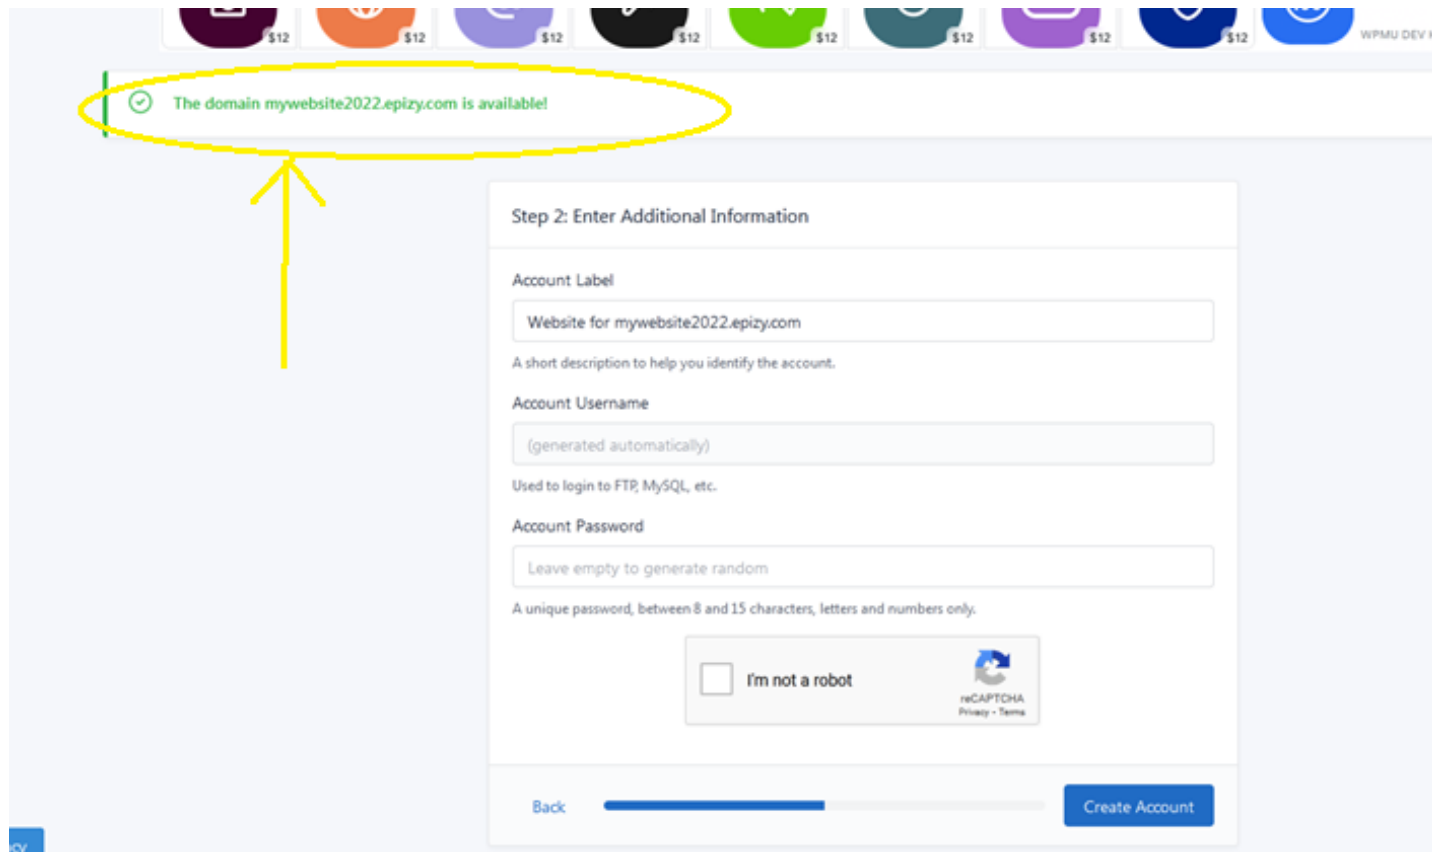

The screenshot shows a web interface for selecting a domain name. At the top, a red error message is displayed in a white box with a red border, circled in yellow. The message reads: "The selected subdomain is already in use on InfinityFree. Please remove the subdomain from your other account at InfinityFree before you can add it to a new account." A yellow arrow points from the bottom of the error message to the "Subdomain" input field in the form below. The form is titled "Step 1: Choose a Domain Name" and contains the following elements:

- Domain Type:** Two buttons, "Subdomain" (which is selected) and "Custom Domain".
- Subdomain:** A text input field containing "mydemoclass".
- Domain Extension:** A dropdown menu showing ".42web.io".
- Footer:** A "Back" link and a blue "Check Availability" button.

Below the form, a note states: "You can add more domains after your account has been created."

“The domain is available.”

If above message appears on your screen (As shown in the yellow circle), this means you have got your desired subdomain.

The screenshot displays a web interface for domain registration. At the top, there is a row of domain icons with a price tag of \$12 each. Below this, a green notification bubble with a checkmark icon contains the text: "The domain mywebsite2022.epizy.com is available!". A yellow circle highlights this message, and a yellow arrow points to it from below. The main content area is titled "Step 2: Enter Additional Information" and contains several input fields: "Account Label" (with the value "Website for mywebsite2022.epizy.com"), "Account Username" (with the value "(generated automatically)"), and "Account Password" (with the value "Leave empty to generate random"). Below the password field is a reCAPTCHA "I'm not a robot" checkbox. At the bottom of the form, there is a "Back" link, a progress bar, and a "Create Account" button.

Now enter **Account Password**. (As shown in the yellow circle 1)

Click on **Create Account** button. (As shown in the yellow circle 2)

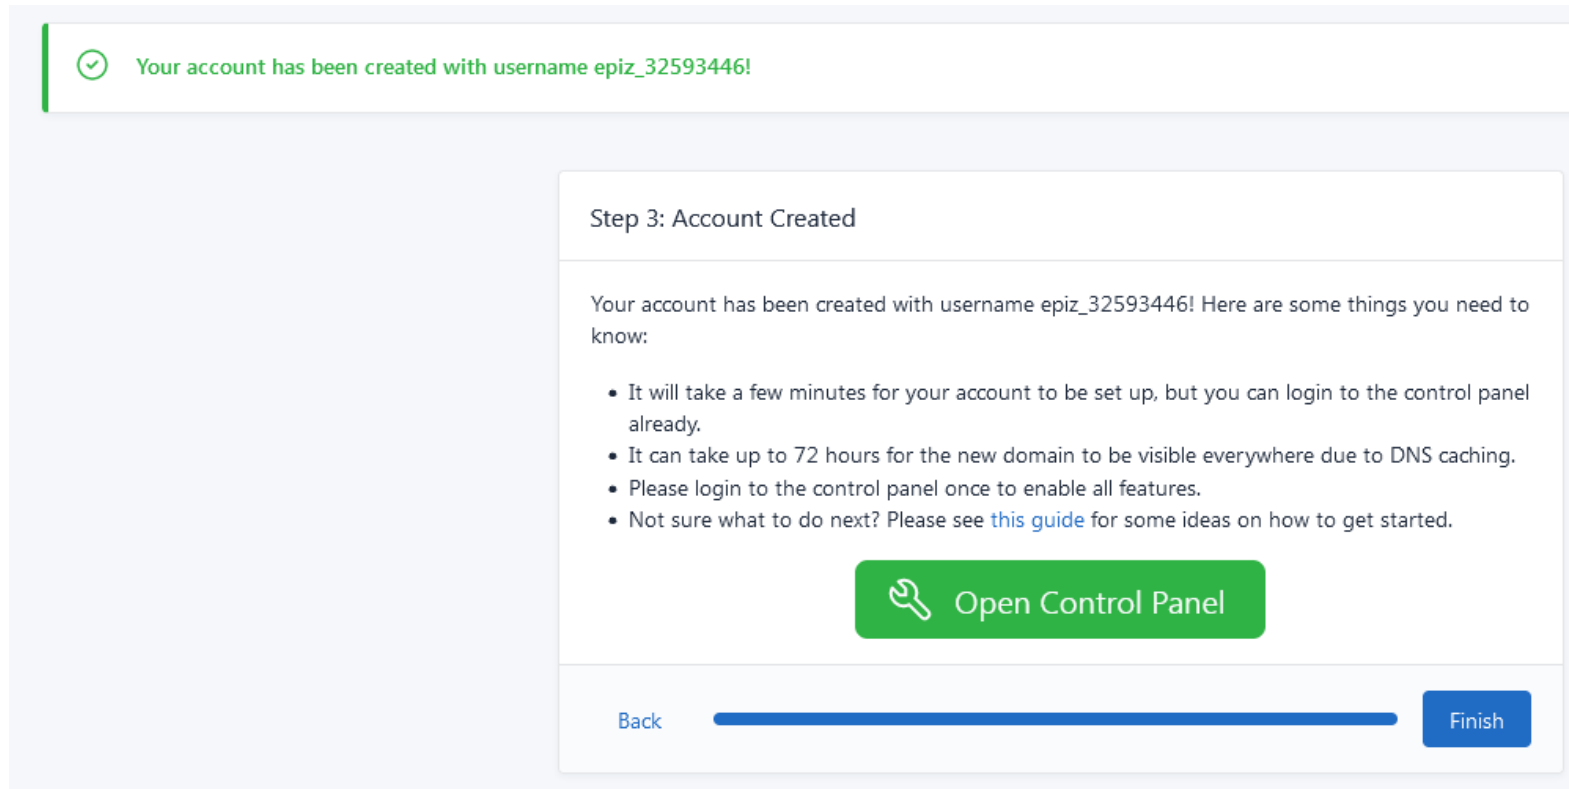

The screenshot shows a web form titled "Step 2: Enter Additional Information". At the top left, a green notification bar states "The domain mywebsite2022.epizy.com is available!". The form contains the following fields and elements:

- Account Label:** A text input field containing "Website for mywebsite2022.epizy.com". Below it is the text "A short description to help you identify the account."
- Account Username:** A text input field containing "(generated automatically)". Below it is the text "Used to login to FTP, MySQL, etc."
- Account Password:** A text input field containing "Leave empty to generate random". Below it is the text "A unique password, between 6 and 20 characters, letters and numbers only." This field is circled in yellow, with a yellow arrow labeled "1" pointing to it.
- reCAPTCHA:** A checkbox labeled "I'm not a robot" next to the reCAPTCHA logo and "Privacy - Terms" link.
- Navigation:** A "Back" link and a blue "Create Account" button. The "Create Account" button is circled in yellow, with a yellow arrow labeled "2" pointing to it.

The Windows taskbar is visible at the bottom of the screen.

Now following screen will appear with Finish button.

Click on **Finish** button.

✔ Your account has been created with username epiz_32593446!

Step 3: Account Created

Your account has been created with username epiz_32593446! Here are some things you need to know:

- It will take a few minutes for your account to be set up, but you can login to the control panel already.
- It can take up to 72 hours for the new domain to be visible everywhere due to DNS caching.
- Please login to the control panel once to enable all features.
- Not sure what to do next? Please see [this guide](#) for some ideas on how to get started.

 Open Control Panel

Back  Finish

Following screen will appear. It means your website is ready with your domain name.

The screenshot shows a web browser window displaying the account management interface for a hosting service. The browser's address bar shows the URL `https://app.infinityfree.net/accounts/epiz_32593446`. The page features a navigation bar with buttons for 'Control Panel' and 'File Manager'. A warning message at the top states: 'Don't see your website yet? Please note that it can take up to 72 hours for a new domain name or hosting account to start working everywhere. Learn more.'

The main content area is divided into several sections:

- Account Details:** Shows the account username as `epiz_32593446`, a masked password, an 'Active' status, a label 'Website for mywebsite2022.epizy.com', a main domain `kvj@def.epizy.com`, an unknown website IP, a hosting volume of `vol4_4`, and a creation date of `2022-09-14`.
- FTP Details:** Shows the FTP username as `epiz_32593446`, a masked FTP password, an FTP hostname of `ftpupload.net`, and an optional FTP port of `21`.
- Account Settings:** Includes buttons for 'Edit Account', 'Deactivation History', 'Redirects', and 'Protected Directories'.
- MySQL Details:** Shows the MySQL username as `epiz_32593446`, a masked MySQL password, a MySQL hostname of `sql213.epizy.com`, an optional MySQL port of `3306`, and a database name `epiz_32593446_XXX` with a note to create it in the control panel.
- Domains and Subdomains:** Features a 'Refresh' button and a table with columns 'DOMAIN', 'TYPE', and 'FILE MANAGER'. The table lists one subdomain: `mywebsite2022.epizy.com`. Below the table, it indicates '1 total domains' and provides a 'View All Domains' button.

The Windows taskbar at the bottom shows the system clock at `09:27 14-09-2022` and various application icons.

Click on **Control Panel** button. (As shown in the yellow circle)

Following screen will appear.

The screenshot displays the InfinityFree cPanel interface. At the top, the browser address bar shows the URL `https://cpanel.epizy.com/panel/indexpl.php?id=4efae95462dde0a19e10dfc0223733433622a4d8`. The page header includes the InfinityFree logo and a user profile for 'EPIZ_32537258' with a 'LOG OUT' button.

The main content area is organized into several sections:

- ADVERTISEMENT:** A search bar with the placeholder text 'Find functions quickly by typing here.' Below it is a section for 'SEARCH FOR A NEW DOMAIN NAME' with an input field, a dropdown menu set to '.info', and a 'Check Now' button.
- PREFERENCES:** A row of four icons with labels: 'Update Contact Email', 'Getting Started', 'Account Upgrades', and 'Account Settings'.
- FILES:** A row of five icons with labels: 'Online File Manager', 'Directory Privacy', 'FTP Accounts', 'Free FTP Software', and 'Backups'.
- DATABASES:** A section header with a minus sign, currently collapsed.

On the right side, there is a sidebar with two main sections:

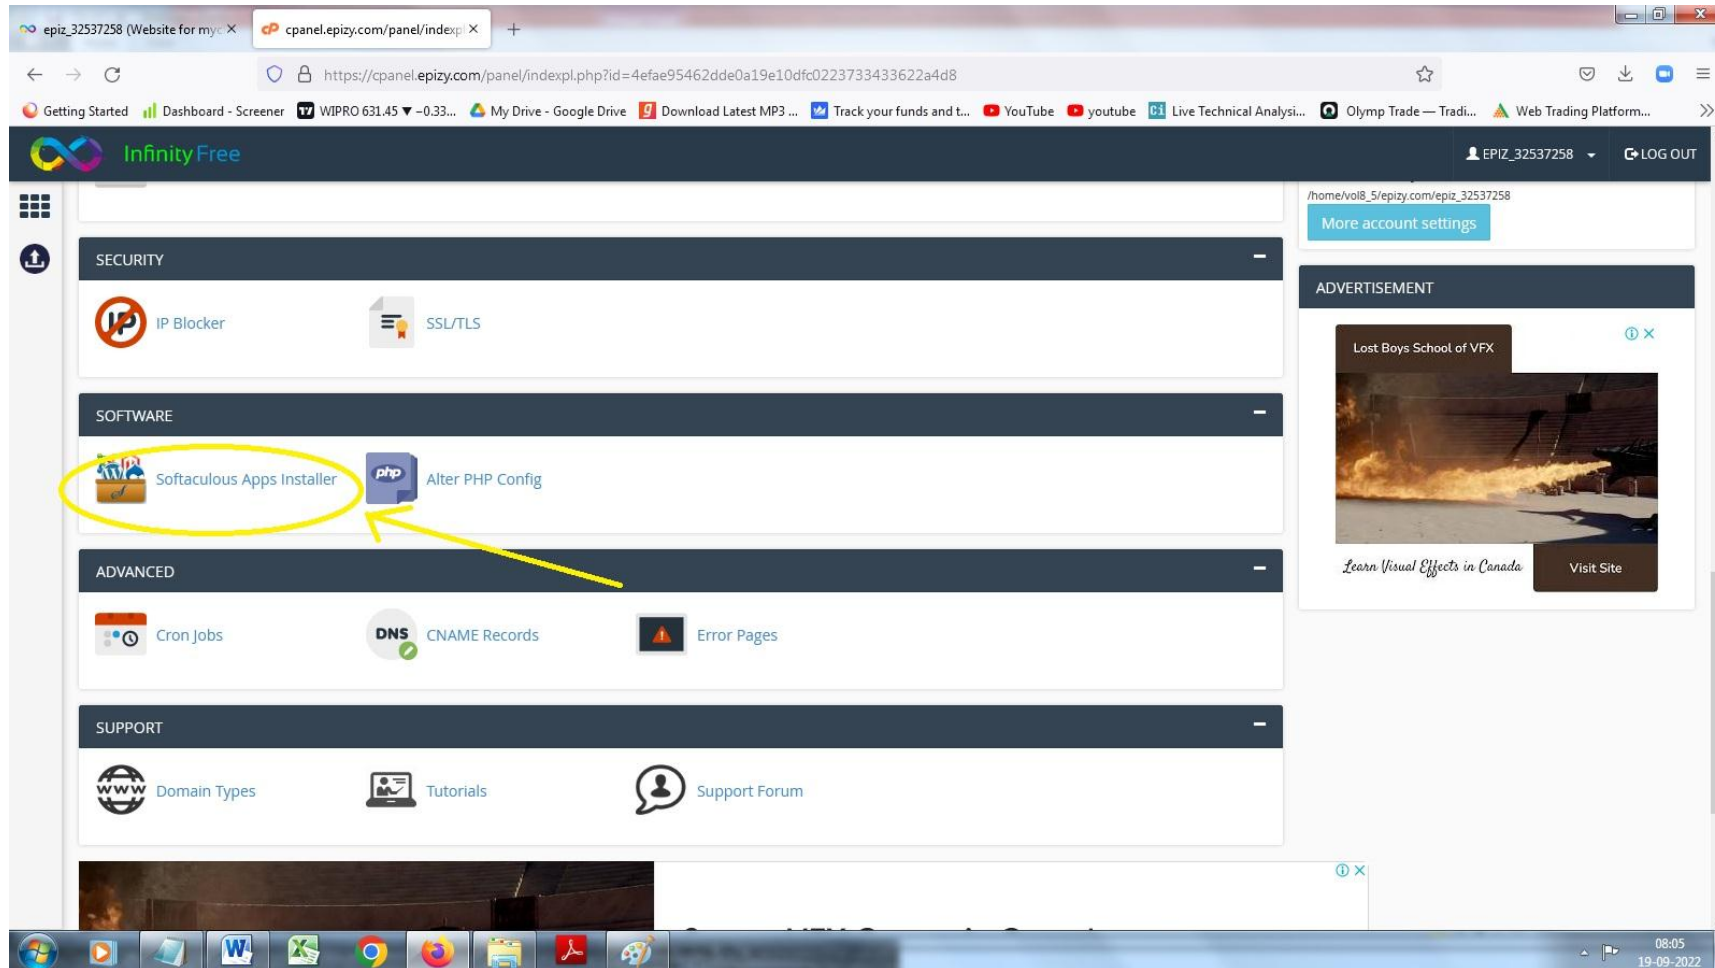

- ADVERTISEMENT:** A promotional banner for 'Start Your Free Trial' by WPMU DEV Hosting, featuring a globe icon and a '@' icon.
- STATISTICS:** A table showing account details:

STATISTICS	
Plan:	infinityfree
FTP accounts:	1 / 1
Sub-Domains:	0 / Unlimited
Add-on Domains:	1 / Unlimited
Parked Domains:	0 / Unlimited
MySQL Databases:	1 / Unlimited
Disk Quota:	5120 MB
Disk Space Used:	90 MB

The Windows taskbar at the bottom shows various application icons and the system clock indicating 08:02 on 19-09-2022.

Go to the **Software** section.

Click on the **Softaculous Apps Installer**. (As shown in the yellow circle)

Following screen will appear.

Click on the **Install** Button to install Wordpress. (As shown in the yellow circle)

The screenshot displays the Softaculous website interface. At the top, there are browser tabs and a search bar. The main content area features a navigation menu on the left and a central section titled "Top Scripts". A green notification banner at the top reads "Did you know? You can search apps by their name from the Search box in the left menu". Below this, there are two buttons: "Installations" (1) and "Outdated Installations" (0). The "Top Scripts" section lists several applications: WordPress, Joomla, AbanteCart, phpBB, SMF, and WHMCS. Each application card includes an "Install" button, a "Demo" button, and an "Overview" button. The "Install" button for WordPress is highlighted with a yellow circle and a yellow arrow pointing to it. The bottom of the screen shows the Windows taskbar with various application icons and the system clock indicating 08:07 on 19-09-2022.

Following screen will appear.

The screenshot shows a web browser window displaying the Softaculous installation interface for WordPress. The browser's address bar shows the URL: `https://sv1.scriptinstall.rocks:2083/cpsess9758602229/frontend/x3/softaculous/index.live.php?act=software&soft=26&tab=install`. A green notification banner at the top states: "You can import your installations from a remote server to Softaculous using the 'From Remote Server' tab".

The main content area features the WordPress logo and the following information:

- WordPress** (★★★★★)
- Version : 6.0, 5.9.3, 5.8.4, 5.7.6, 5.6.8, 5.5.9, 5.4.10, 5.3.12, 5.2.15, 5.1.13, 5.0.16, 4.9.20
- Release Date : 24-05-2022

A navigation bar includes tabs for: **Install** (selected), Overview, Features, Screenshots, Demo, Ratings, Reviews, and Import.

The **Software Setup** section contains a **Quick Install** button and two main configuration areas:

- Choose Installation URL:** "Please choose the URL to install the software". It includes dropdowns for "Choose Protocol" (set to `http://`), "Choose Domain" (set to `mychandrapurcity.epizy.com`), and "In Directory".
- Choose the version you want to install:** "Please select the version to install." It includes a dropdown menu currently set to `6.0`.

Below the software setup are two columns of settings:

- Site Settings:**
 - Site Name: `My Blog`
 - Site Description: `My WordPress Blog`
- Admin Account:**
 - Admin Username: (empty field)
 - Admin Password: `4b@E@Z7ISy`

The Windows taskbar at the bottom shows the system clock as 08:09 on 19-09-2022.

Fill the details of Admin Account, as Admin **Username** and **Password**. (As shown in the yellow circle)

The screenshot displays the Softaculous installation interface. The 'Admin Account' section is highlighted with a yellow circle, and a yellow arrow points to the 'Admin Password' field. The 'Admin Username' field contains 'Admin' and the 'Admin Password' field contains 'Guest123!@#'. The 'Admin Email' field contains 'raviguru012@gmail.com'. The 'Site Settings' section shows 'Site Name' as 'My Blog' and 'Site Description' as 'My WordPress Blog'. The 'Software Setup' section shows the installation URL as 'http://mychandrapurcity.epizy.com' and the version as '6.0'. The 'Quick Install' button is visible in the top right corner.

Scroll down below the screen, and click on **Install** button. (As shown in the yellow circle)

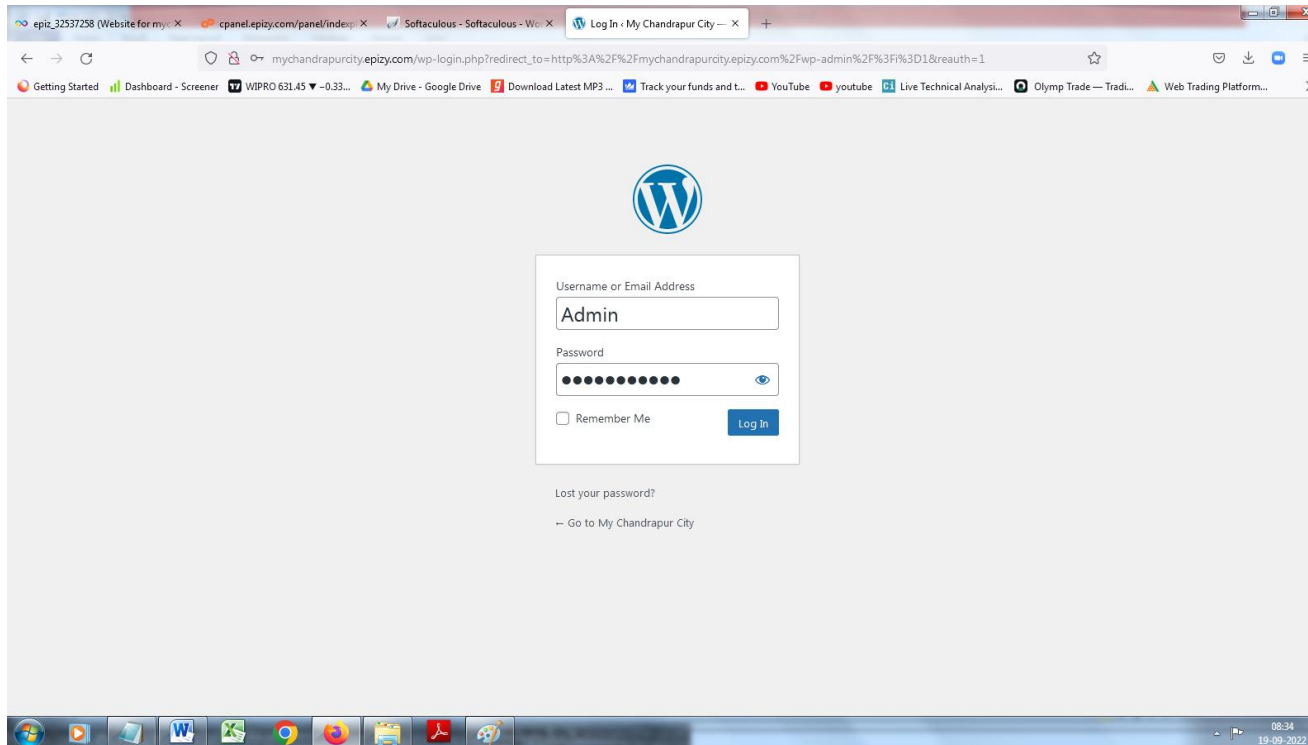

The screenshot shows a web browser window displaying a WordPress theme installation interface. The address bar shows the URL: `https://sv1.scriptinstall.rocks:2083/cpsess6556211642/frontend/x3/softaculous/index.live.php?act=software&soft=26&tab=install`. A note at the top states: "Note: This is optional. If not selected, the default theme will be installed. Themes are provided by PopularFX and built on Pagelayer Editor." Below the note, four theme preview cards are displayed: "Twenty Twenty-Two (Default WordPress Theme)", "Financy", "Helpers", and "Explorer". At the bottom of the preview area, there is a "Show All Themes" button and an "Install" button. A yellow arrow points to the "Install" button, which is also circled in yellow. The Windows taskbar at the bottom shows the system time as 08:24 on 19-09-2022.

After the completion of the Wordpress Intallation, you can login to the Wordpress Dashboard by using the Admin Username and Password.

For this you have to type domain name in the browser followed by **/wp-admin**.

For example :- If you have your domain name as **mychandrapurcity.epizy.com** then type in the browser as shown below.

<http://mychandrapurcity.epizy.com/wp-admin>

Once you logged in you will get a Wordpress Dashboard screen as shown below.

Now you can develop your desired Website using this Wordpress Dashboard.
